Our Lady of the Snows School

February 13, 2012

We are going on a field trip! We are going to the Museum of Science and Industry, Wednesday, Feb. 29. Our plans include visiting the Idea Factory, the new Ants exhibit, and the chickens hatchery. We will also eat our bag lunches in the museum. The permission slips were sent home last week. Please return your forms as we need to send the museum the number of participants by the end of this week.

Taking field trips helps children learn about the world around them. They use and further develop their observational skills while exploring their surroundings. Children are able to learn more from first-hands and hands-on experiences than just looking at pictures or listening to a lecture. And field trips are also fun and provide a change from the classroom.

We are having a Valentine celebration this Tuesday. The children will distribute their cards in the morning and enjoy some special treats. The envelopes should not be addressed, but the children may sign the cards. This saves us a great deal of time and allows the children to simply put a card in each student's mailbox. If you are providing cards, please send in enough for the 21 children in the classroom.

The FSA is meeting this Thursday at 7:00 pm. All parents are invited to attend.

There is no school this Friday. The teachers are attending a religious in-service in the school.

There is no school next Monday. It is President's Day, a federal holiday.

The Little Sisters of the Poor is looking for donations to provide care for the elderly poor. Please see the back of this newsletter for a list of some suggested items.
